

INDIAN POND

Lexington Twp., Somerset County
U.S.G.S. New Portland, Maine (7½')

Fishes

Chain pickerel	Redbreast sunfish
Minnows	Pumpkinseed sunfish
Blacknose dace	

Physical Characteristics

Area - 53 acres	Temperatures
	Surface - 76°F
Maximum depth - 22 feet	20 feet - 54°F

Principal fisheries: Chain pickerel

Indian Pond is located west of Gilman Pond Mountain. A small inlet enters the south shore of the pond. Its outlet, Indian Stream, flows southwest through Little Indian Pond into the Carrabassett River. The pond's shoreline is undeveloped.

Water quality in Indian Pond is marginal for coldwater gamefish. A well-established pickerel population precludes the possibility of maintaining a satisfactory coldwater fishery. The pond is not stocked. However, pickerel thrive in the warm, shallow pond and provide an attractive fishery.

Indian Pond is accessible via the Lexington Road off Route 16. The pond is open to fishing in both the summer and winter seasons under general law. See the lawbook for additional regulations.

Surveyed - August, 1958
